PPA Assignment 1

This coursework is designed to test the content from Topics 1, 2 and 3.

Do you think there is a problem with any of the content below? Let us know immediately at programming@kcl.ac.uk.

1. Create a class `Messages` with the following methods:

   1. `namePrinter` that prints your own name. (1 mark)

   2. `wordPrinter` that can print the word ``Hotel''. (1 mark)

   3. `incrementPrinter` that prints the number that one greater than a supplied number. (2 marks)

2. Create a class `MessagePrinter`, which can be compiled and run from the command line. Use this class to do the following (in order), using the functions of your `Message` class:

   1. Print your name. (1 mark)

   2. Print the word ``Hotel''. (1 mark)

   3. Print the number greater than 4. (1 mark)
